Sir:

Submitted herewith on Form PTO/SB/08 is a listing of documents known to Applicant in order to comply with Applicant's duty of disclosure pursuant to 37 CFR §1.56.

A copy of each non-U.S. patent document and each non-patent document is being submitted to comply with the provisions of 37 CFR §1.97 and §1.98.

The submission of any document herewith, which is not a statutory bar, is not intended as an admission that such document constitutes prior art against the claims of the present application or that such document is considered material to patentability as defined in 37 CFR §1.56(b). Applicant does not waive any rights to take any action which would be appropriate to antedate or otherwise remove as a competent reference any document which is determined to be a *prima facie* art reference against the claims of the present application.

### **RELEVANCE OF EACH DOCUMENT**

Documents A1 and A3 are U.S. counterparts of Document A8.

Document A2 is a U.S. counterpart of Document A9.

Document A5 relates to a data compressor, data compression method and storage medium to realize a high compression rate and high image quality of a reproduced image by discriminating the similarity between macro blocks among frames configuring a dynamic image with higher accuracy.

Document A6 relates to a method and device for encoding moving image to reduce an encoding quantity and to prevent deterioration in picture quality by performing warping motion compensating operation by making a jump by the number of frames determined by both the variation quantities of a moving image being inputted and an encoding quantity being outputted and multiplexing the encoded signal of a moving vector, the preliminary error signal of frames, and the encoded signal of the number of frames.

Document A7 relates to a dynamic image data provider system to minimize a moving image data amount by providing a reference state recording means, a compression rate decision means, and a data compression means compressing dynamic image data in response to the decided compression rate and transferring the compressed data to a dynamic image reproduction device in the system.

Documents A3, A8 and A9, listed on the attached PTO/SB/08 were cited as being relevant during the prosecution of the corresponding International application. A copy of the International Search Report is attached setting forth the portion of each document considered
